

# INNOVATIVE INSTITUTE OF LAW

Approved by Bar Council of India (BCI), Delhi & Affiliated To CCS University, Meerut, U. P.

## GROUND WATER RECHARGING

Rainwater harvesting at the Innovative Institute of Law represents a proactive approach to sustainability and resource management. By collecting and storing rainwater from rooftops and other surfaces, the institute can significantly reduce its reliance on municipal water sources. This initiative not only conserves water but also minimizes runoff, helping to prevent soil erosion and reduce flooding in the surrounding area.

**Using A Motor In Rainwater Harvesting Systems** enhances the efficiency of collecting and distributing rainwater. The motor can be employed to pump stored rainwater from underground tanks or cisterns to various points of use within the Innovative Institute of Law, such as irrigation systems, toilets, and other facilities. This ensures that the collected rainwater is easily accessible and can be used effectively for non-potable purposes, promoting water conservation.
